

DEV

- Elevated Access Levels to facilitate development
- Obscured sensitive data
- Varied upstream configuration facets

TEST

- Revised access levels to test / validate connectivity to and general functionality of developed solutions
- Obscured sensitive data
- Varied upstream configuration facets

UAT

- Access granted to end-user delegates to test / validate **comprehensive** solution
- Sensitive data partially obscured.
- Results extrapolated
- Varied upstream configuration facets

PROD

- Business / Production Ready State
- Sensitive data present.
- Results reported upon
- Resources allocated to promote throughput and performant solution operation
